Big Life

MySkills Sports School

I attended an event run by the Manchester Dyslexia Institute and I found it informative and very worthwhile.

I have been involved in disability issues for many years and I found this event well organised and very inclusive. The interaction and work in groups was excellent and I learned many things which in turn I shared with others. However, the most important thing in my view was the seamless inclusivity which ran throughout the whole day and this in itself reflects the values of the institute. The information regarding software and various other up-to-date technological advances proved very very helpful to myself and many of the groups I have since shared it with.

If given the opportunity I would encourage anyone who can to attend events that the Institute organise as they are very hands on and helpful.
